ANNUAL INDEX, Vol. 12

A

Agency we trust, The (Hot Wire from NCA), September 52
All-important 'face boss', The (Comment), April 8
Amax Coal Co., Indianapolis, Ind., May 59
American Electric Power Corp., Meigs Mine 1 and 2, Cheshire, Ohio, February 34
American Mining Congress
—'75 AMC Coal Convention, The, April 56
Association heralds career opportunities in coal, September 64
Atkins, L.A., Busch, R.A., & Backer, R.R.
—Coal waste bank parameters given in new USBM report, July 52

B

Backer, R.R., Busch, R.A., & Atkins, L.A.
—Coal waste bank parameters given in new USBM report, July 52
Baczewski, K.C., Ferretti, E.J., & Mengon, A.C.
—Coal gasification will not be cheap, but compulsory, July 46
—Is coal gasification ready to meet energy needs?, May 38
Balancing the center in business organization, November 56
Berg, Eugene & Thomas P. Kroehle
—Coal '75: The manufacturers' perspective, January 44
Berklund, Curt
—BLM's logic on leasing is defined, May 50
Blakely, J. Wes
—A day with 'Liv', August 42
—Industry can fill the education gap, April 60
—Kentucky Harlan gets top production from its system & workers, October 46
—Peabody's drill/blast policies prove most effective, June 56
—Perry Bros. perform superb reclamation, March 36
—Republic's employee-oriented safety plan, December 52
—Scraper in surface mining, The, June 68
—'75 AMC Coal Convention, The, April 56
—Triple-head auger proves its worth in low seam coals, October 66
—Underground safety—The law, the men, the programs, December 48
Blessing, John A.
—One way out of the capital crunch, March 46
BLM's logic on leasing is defined, May 50
Brandenburg, Charles F., Fischer, D.D. & Schrider, Leo A.
—In situ coal gasification looks promising, June 59
Breakthroughs needed in production technology (Hot Wire from NCA), October 36
British longwall operation expands under sea, March 40
Burcik, E.J. & Slobod, R.L.
—Gel infusion works to control methane, May 45
Bureaucratic whims handcuff & confuse equipment makers, December 55
Busch, R.A., Backer, R.R., Atkins, L.A.
—Coal waste bank parameters given in new USBM report, July 52

C

Cabs and canopies underground do protect miners, February 40
Cairns, John S.
—Balancing the center in business organization, November 56
Cement industry offers coal a ready conversion market, July 45
Coal and the railroads, January 62
Coal gasification will not be cheap, but compulsory — Part II, July 46
Coal, nuclear industries play complementary roles, August 51
Coal '75: The manufacturers' perspective, January 44
Coal waste bank parameters given in new USBM report, July 52
Collett, Hugh
—Falkie calls manpower problem "coal's Achilles' heel", May 56
—Regional meetings focus on new technologies, solving problems, January 60
Colorado firm produces 3 million tons at 7,000 feet, November 38
Computer keeps tally on production costs, May 59
Conflict flares at Institute meeting, November 60
Congress deals devastating blow (Hot Wire from NCA), June 48
Cornforth (Nolden), Carol
—P&M's Midway Mine fires Kansas plant, June 52
—Reclamation forges ahead throughout the land, January 50
—Rotary tray dryer fills the bill for HRI, September 66
—Western growth is keyed to leasing & water, June 64
—Zarb calls for "evenhandedness" to solve energy problems, July 62
Courtney, William J.
—A view of the energy problem, March 52
Crago, George A.
—Revision of '69 mine law sought, September 90
—The law and MESA's conflict with state regulatory agencies, December 56
Current status of coal gasification, The, December 74
Current trends in coal preparation, September 74

D

Day with 'Liv', A, August 42
Deppe, Wm. L.
—Optimism prevails for solvent refining, August 48
Developing clean energy from coal, March 48
Developing industrial fuel gas from coal, November 46

E

Eastern Associated Coal Corp., Pittsburgh, Pa., December 68
Energy Fuels Corp., Routt Co., Steamboat Springs, Colo., November 38
Energy growth and the law (Hot Wire from NCA), August 34
Exhibitors promote products, services for "meeting coal's concerns", October 55

F

Falkie calls manpower problem "coal's Achilles' heel", May 56
Falkie, Thomas V.
—Philosophy of coal mining research, A, January 57
Ferretti, Emmett J.
—Developing clean energy from coal, March 48
—Developing industrial gas from coal, November 46
Ferretti, E.J., Baczewski, K.C., Mengon, A.C.
—Coal gasification will not be cheap, but compulsory—Part II, July 46
—Is coal gasification ready to meet energy needs? Part I, May 38
Ferretti, E. J. & Kasper, S.
—Current status of coal gasification, The, December 74
Finance plan—key to success of new terminal, May 48
Fischer, Dennis D., Brandenburg, C. F. & Schrider, Leo A.
—In situ coal gasification looks promising, June 59
Fishwick, John P.
—Coal and the railroads, January 62

G

Galey, G.
—Pipelines versus unit trains, January 64
Gas well sealing projects portend recovery of coal otherwise lost, November 52
Gel infusion works to control methane, May 45
Getting down to brass tacks (Comment), July 6
Gray, Richard E. & Parker, Wendell W.
—Making the grade in coal refuse disposal, November 43
Greenwich Collieries, Barnesboro, Pa., November 50
Greenwich switches to fiberglass/epoxy pipe, November 50

H

Hand, J.W. & Levene, H.D.
—Sulfur stays in the ash when lignite burns, February 46
Hitting the road for coal (Comment), May 8
Holz, Peter
—Opencast mining catches on in S. Africa, March 44
Horne Bros. mine—best of three worlds, February 38
Horne Bros. Mining Co., near Wise, Va., February 38

I

Increasing market, legal demands push preparation plant modifications, September 56
Industry can achieve 1985 goal, August 47
Industry can fill the education gap, April 60
In situ coal gasification looks promising, June 59
Ironman, Ralph
—British longwall operation expands under sea, March 40
Is coal gasification ready to meet energy needs?—Part I, May 38
Is your mine adequately covered? May 52

J

Johnson, Tegner C.
—Stripping machine availability, April 60

K

Kaiser Resources Ltd., Elkview Preparation Plant, Sparwood, B.C., October 70
Kasper, S. & Ferretti, E. J.
—Current status of coal gasification, The, December 74
Kentucky Coal Association, January 60
Kentucky Harlan Coal Co., Harlan Co., Coaliron, Ky., October 46
Kentucky Harlan gets top production from its system & workers, October 46
Kroehle, Thomas P. & Berg, Eugene
—Coal '75: The manufacturers' perspective, January 44

L

Laird, William
—New system and tunneling machine could speed main, sub-main entries, December 68
Law and MESA's conflict with state regulatory agencies, The, December 56
Let there be gasification (Comment), November 6
Let's set aside the slogans (Hot Wire from NCA), December 27
Levene, H.D. & Hand, J.W.
—Sulfur stays in the ash when lignite burns, February 46
Lindsay, L.J. & Maloney, J.P.
—Modifications increase Elkview plant's productivity, October 70

M

Making the grade in coal refuse disposal, November 43
Maneval, David R.
—Reclaiming land for recreational development, Part I, April 84
—Recreational development on reclaimed land, Part II, June 74
Manpower—Key to energy resources growth, August 54
Mason, Richard H.
—Colorado firm produces 3 million tons at 7,000 feet, November 38
—Increasing market, legal demands push preparation plant modifications, September 56
—Is your mine adequately covered? May 52
—Richey advocates new communications direction, September 84
Massive conveyor system supplies AEP's Gavin plant, February 34
Maloney, J.P. & Lindsay, L.J.
—Modifications increase Elkview plant's productivity, October 70
McCormick, John A. & Sawyer, Stephen G.
—Cabs & canopies underground do protect miners, February 40
McIntyre, G.F.
—Polymers optimize plant water clarification, September 61
Mengon, A.C., Ferretti, E.J., & Baczewski, K.C.
—Coal gasification will not be cheap, but compulsory—Part II, July 46
—Is coal gasification ready to meet energy needs? Part I, May 38
Minority rule concept, The (Comment), October 8
Modifications increase Elkview plant's productivity, October 70
Monetary collision course, A (Hot Wire from NCA), February 30

N

National Coal Association, NCA/BCR Coal Conference & Expo II, Louisville, Ky., October 50
National commitment to coal, A (Hot Wire from NCA), January 23
National defense education act needed, A (Hot Wire from NCA), April 34
New Oklahoma mine—a success from the start, July 58
New system and tunneling machine could speed main, sub-main entries, December 68
New triple-head auger proves its worth in low seam coals, October 66
Nickeson, Floyd H.
—Record crowd attends 23rd ME-MMA meeting, September 89
Noble, George
—Public invited in on planning for $30 million facility, January 66
NOW is the time (Comment), March 8

O

OCR meeting signals commitment to coal, February 45
Of czars and policemen (Comment), December 8
One more tool to inform the public (Hot Wire from NCA), July 37
One way out of the capital crunch, March 46
Opencast mining catches on in South Africa, March 44
Optimism prevails for solvent refining, August 48
Orcutt, Jack

—Special brakes aid new Utah mine's conveyor, July 42
Our common democratic inadequacies (Hot Wire from NCA), November 29

P

Palladino, Anthony P.
—Finance plan—key to success of new terminal, May 48
Parker, Wendell W. & Gray, Richard E.
—Making the grade in coal refuse disposal, November 43
Pasini III, J. & Resnick, Gerald E.
—Gas well sealing projects portend recovery of coal otherwise lost, November 52
Peabody's drill/blast policies prove most effective, June 56
Peabody training center simulates real underground conditions, December 62
Perry Bros. perform superb reclamation, March 36
P&M's Midway Mine fires Kansas plant, June 52
Philosophy of coal mining research, A, January 57
Pine Branch Coal Sales, Inc., Perry Co., Chavies, Ky., October 66
Pipelines versus unit trains, January 64
Pittsburg and Midway Coal Mining Co., Midway Mine, Amsterdam, Mo., June 52
Plus factors for coal slurry pipelines, September 68
Polymers optimize plant water clarification, September 61
Poundstone, William N.
—What's needed on research, January 54
Powers, Dr. Philip N.
—Coal, nuclear industries play complementary roles, August 51
Preparation/Processing
—Coal gasification will not be cheap, but compulsory—Part II, July 46
—Current status of coal gasification, The, December 74
—Current trends in coal preparation, September 74
—Developing clean energy from coal, March 48
—Developing industrial fuel gas from coal, November 46
—In situ coal gasification looks promising, June 59
—Increasing market, legal demands push preparation plant modifications, September 56
—Is coal gasification ready to meet energy needs? Part I, May 38
—Making the grade in coal refuse disposal, November 43
—Modifications increase Elkview plant's productivity, October 70
—Optimism prevails for solvent refining, August 48
—Polymers optimize plant water clarification, September 61
—Research imperative to improve thermal drying, September 80
—Rotary tray dryer fills the bill for HRI, September 66
President talks hard and straight (Hot Wire from NCA), March 20
Products for greater safety underground, December 58
Public invited in on planning for $30 million facility, January 66

R

Reclaiming land for recreational development, Part I, April 84
Reclamation forges ahead throughout the land, January 50
Record crowd attends 23rd ME-MMA meeting, September 89
Recreational development on reclaimed land, Part II, June 74
Regional meetings focus on new technologies, solving problems, January 59
Resnick, Gerald E. & Pasini III, J.
—Gas well sealing projects portend recovery of coal otherwise lost, November 52
Republic's employee-oriented safety plan, December 52
Republic Steel Corp., Northern Coal Mines, Uniontown, Pa., December 52
Research imperative to improve thermal drying, September 80
Revision of '69 mine law sought, September 90
Richey advocates new communications direction, September 84
Rotary tray dryer fills the bill for HRI, September 66

S

Sawyer, Stephen G., & McCormick, John A.
—Cabs & canopies underground do protect miners, February 40
Schmidt, Richard A.
—Current trends in coal preparation, September 74
Schrider, Leo A., Fischer, D.D. & Brandenburg, C.F.
—In situ coal gasification looks promising, June 59
Scraper in surface mining, The, June 68
'75 AMC Coal Convention, The, April 56
Shaft sinking opens new mining area in South Africa, August 60
65 MESA films available, March 58
Slobod, R.L. & Burcik, E.J.
—Gel infusion works to control methane, May 45
Smith versus Big Brother (Comment), August 6
Special brakes aid new Utah mine's conveyor, July 42
Spring and the blooming coal industry (Hot Wire from NCA), May 26
Stearn, Enid W.
—Bureaucratic whims handcuff & confuse equipment makers, December 55
Steele, H. Edward
—Conflict flares at Institute meeting, November 60
—Industry can achieve 1985 goal, August 47
—Regional meetings focus on new technologies, solving problems, January 59
Strubig, Kelly C.
—"Wet-head" tests on miners concluded, April 78
Sulfur stays in the ash when lignite burns, February 46
Surface mining
—Colorado firm produces 3 million tons at 7,000 feet, November 38
—Horne Bros. mine—the best of three worlds, February 38
—New Oklahoma mine—a success from the start, July 58
—New triple-head auger proves its worth in low seam coals, October 66
—Opencast mining catches on in South Africa, March 44
—Peabody's drill/blast policies prove most effective, June 56
—Perry Brothers perform superb reclamation, March 36
—P&M's Midway Mine fires Kansas plant, June 52
—Reclaiming land for recreational development, Part I, April 84
—Reclamation forges ahead throughout the land, January 50
—Recreational development on reclaimed land, Part II, June 74
—Scraper in surface mining, The, June 68
—Virginia contractor opens 8-ft seam at new operation, July 56

T

Tillman, David A.
—Peabody training center simulates real underground conditions, December 62
TVA and Peabody (Comment), February 6

U

Underground mining
—British longwall operation expands under sea, March 40
—Cabs & canopies underground do protect miners, February 40
—Gas well sealing projects portend recovery of coal otherwise lost, November 52
—Greenwich switches to fiberglass/epoxy pipe, November 50
—Kentucky Harlan gets top production from its system & workers, October 46
—New system and tunneling machine could speed main, sub-main entries, December 68
—Peabody training center simulates real underground conditions, December 62
—Products for greater safety underground, December 58
—Republic's employee-oriented safety plan, December 52
—Shaft sinking opens new mining area in South Africa, August 60
—Special brakes aid new Utah mine's conveyor, July 42
—Underground safety—The law, the men, the programs, December 48
—"Wet-head" tests on miners concluded, April 78
Underground safety—The law, the men, the programs, December 48
USBM active coal research program, February 49
Utley, Thomas R.
—Manpower—Key to energy resources growth, August 54

V

Venkatesan, Stan
—Research imperative to improve thermal drying, September 80
Viciana, James J.
—Massive conveyor system supplies AEP's Gavin plant, February 34
View of the energy problem, A, March 52
Virginia contractor opens 8-ft seam at new operation, July 56

W

War of communications, The (Comment), June 10
Wasp, Edward J.
—Plus factors for coal slurry pipelines, September 68
Western growth is keyed to leasing & water, June 64
Westmoreland Coal Co., Stonega Div., Big Stone Gap, Va., October 63
Westmoreland uses TV dramatically in employee orientation, October 63
"Wet-head" tests on miners concluded, April 78
What's needed on research, January 54
Where's the energy game plan? (Comment), January 8
Wide range of topics, displays ahead at National Coal Assn's Conference & Expo II, October 50
Wiles, Edwin K.
—Association heralds career opportunities in coal, September 64

Z

Zarb calls for "evenhandedness" to solve energy problems, July 62
